

Dear Reimer/Samme\*,

Greetings hoping you are fine? Am too fine and every thing is very stable there is no problem.

I have written this letter to thank you for paying my school fees. The second term has also ended and I got my report, I was able to score A<sup>+</sup> in practical of Electrical Installation and A in theory. Our school is very amazing where this term is when games and sports took place. Me, I participated in Athletics. This term also has election and I contested at the post of Guild president and I was able to win the post and thank God who enabled to become a prefect.

At our school, our class as Electrical installation we have our choir and every Friday we lead for prayers.

In Uganda, rain has become two with his friend Sunshine and in this holiday I will plant some maize which we will eat in Christmas festivals. I also have a plant or garden of tomatoes and I know that they are already to be harvested. There is another plan of rearing animals especially goats because grass has become too much and we need goats to feed on it. I want to start internet studies for beneficial notes but am still lacking the source of communication but in Jesus's name I will get it through working harder.

Our church has programmes of sports in this holiday to enable the youth to show their different talents and I will be able to participate in them. Next term at our school, we are going to field work tours in different courses and it is going to package us or connect us to the all world including markets, company and industries.

Let me stop from here may God bless you, nice time.

Yours sponsored child,  
Lubega Phillip.
